PROUD TO BE CARLISLE COUNTY OWNED AND OPERATED

GUILTY OF RECKLESS MANSLAUGHTER

Jury Finds Anita Roach Guilty of Reckless Manslaughter, Not Guilty on Other Counts

Attorney Will Kautz (far left) makes his closing arguments as Circuit Court Judge Tim langford looks on

By Michael Toon
Carlisle Weekly

The most tragic accident in the history of the Carlisle County School System turned into one of the most emotional trials that has ever taken place in any courtroom in Carlisle County history, as last week a seven woman five man jury listened to the case of Anita Roach in the death of six year-old Logan Simpson.

Roach, in May of 2011, was behind the wheel of the bus that wrecked coming back home from a field trip that rewarded students for accomplishing their reading goals. In that wreck, the life of six year-old Logan Simpson was lost and 20 other students were injured, along with teacher Brooke Kelly and teacher's aide Donna Wilson.

In the past year there has been a lot of talk in the community, as to what happened, how it happened and what the circumstances behind it were. Finally, last week, those circumstances were laid out for all to hear.

In testimony Roach told the court that she kept saying "God, why didn't you take me and let that little boy live?" Roach also admitted fault in the wreck in saying, "I'm sorry, it was my fault, I shouldn't have done it, but I did," Roach said in reference to swerving toward a deer she said was starting to cross the road.

The main battle grounds of this case were in the dispute whether Roach was intoxicated at the time of the accident.

Commonwealth Attorney Mike Stacy attempted to prove that two prescription drugs detected in Roach's bloodstream, Prozac and klonopin, along with pre-existing medical conditions, were to blame for the crash.

Stacy cited multiple visits to doctors seeking prescription medications and Roach not checking off the appropriate boxes in Dr. Zetter's questionnaire during her bus driver's physical. "Roach failed to tell the truth to Dr. Zetter when she was asked if she had any previous injuries or illnesses in the past five years, then marked "no" on the question that asked if she has had a spinal injury. She wanted to keep her job and keep the money coming in," Stacy said. Stacy also cited the two incidences before the fatal crash in which Roach hit a pole at Noble Park and backed into an electric pole as well.

Roach's defense team, led by Will Kautz of Paducah, said the crash was purely an accident, and that Roach was competent at the time. "According to accident reconstructionists, Mrs. Roach's reactions were quick and decisive at the time and there were no signs of impairment," Kautz said. "Mrs. Roach was following the dosage instructions by her two doctors and had full medical clearance to drive the bus," Kautz also said.

After the attorneys gave their closing statements, the jury went behind closed doors to make their decision. After two and a half hours of deliberation, the verdict came back. The jury found Anita Roach guilty of reckless homicide and not guilty of the other counts which included; one count of second-degree manslaughter, two counts of second-degree assault, three counts of fourth-degree assault and 19 counts of wanton endangerment.

The courtroom, after the announcement of the sentencing, was a reaction of shock and sorrow, as gasps and sobbing began to fill the room.

After the verdict was announced, it was then time for the sentencing phase. In the most emotional part of the trial, Commonwealth Attorney Mike Stacy called Melissa Simpson, the mother of Logan Simpson, to the stand to tell the court what life has been like in the past year.

The elementary teachers, neighbors and family of Logan began to cry in the courtroom as Mrs. Simpson spoke. "The last year has been torment, torture as we wonder what will be done for our son's life," Simpson said.

Emotion then began to overtake Simpson as she cried and told the court about how she would like to sometimes just dig up the body of her son and hold him one more time and that she sleeps with his hoodie that he wore everyday to school because at night Logan would always put his arm around his mother and never let her go.

Simpson told of how he wanted to live life and ride dirt tracks with Hunter Comer and Hunter Hays and how her family was inseparable and did everything together. She then told the story of how they were listening to a gospel song on the radio and Logan told her that he didn't want to die. "I looked at Logan and said, ' Honey, you have a long, long life ahead of you. You do not need to worry about any of that.' Then two weeks later ,the accident happened," Simpson said.

After Simpson's emotional testimony, Ron Roach, the husband of Anita Roach, took the stand and spoke about how Anita loved children so much and was more than happy to adopt seven children and keep them together where they wouldn't be split up. Roach told the courtroom in the past year Anita has also been tormented by the accident, and that it would be hard to explain to their three to five year old children why Anita had to go to jail over an accident.

During Mr. Roach's testimony a majority of the crowd excused themselves from the courtroom in disgust and strong emotion.

After another hour and a half of deliberation, the jury came back with the sentencing. At maximum Roach would be facing five years in prison. However, the jury came back with a sentence of one year.

It is possible that with Roach's clean previous record, she would spend only two months in jail. Final sentencing will be set for July 19th and Attorney Will Kautz asked that Roach remain out on bond. However, Circuit Court Judge Tim Langford denied that request, and Anita Roach was taken into custody until her July 19th sentencing.

After court adjourned, many friends and family of Logan Simpson sat in shock and comforted each other, as they began to cope with the results of the day.

Dangerous Drought Conditions Trigger County-Wide Bans

By Michael Toon
Carlisle Weekly

Local Government officials and Fire Department Chiefs are stressing the need for caution and conservation during this historic drought that the county is facing.

Carlisle County Judge Executive Greg Terry ordered a burn ban for the county until further notice last week, and this week that ban continues along with a new ban, a ban on the usage of all fireworks.

During the July 3, 2012, Carlisle County Fiscal Court meeting Judge Executive Terry told fiscal court members that he hated to tell people not to use their fireworks. " I hate telling people that they cannot use their fireworks or celebrate the 4th of July in that manner, but the drought situation and dry conditions have left no choice for the county to have to do this. We are at a dangerous time right now," Terry said.

When speaking with Cunningham Fire Department Chief Dan Bowles, Bowles told the Carlisle Weekly that fireworks do not have to be shot on the fourth. "With the dry conditions we are facing right now it simply is not worth it. One spark could start an uncontrollable blaze," Bowles said.

Bowles also said that with the remnants of the ice storm on the ground, those branches that fell could act as kindling for a major fire. "In that situation we would have to stand outside of the perimeter of the fire and hope for containment," Bowles said.

Bowles also spoke about the need for water conservation, as he also serves as the Chairman on the Cunningham Water District. Bowles said that people need to think about the water table in which the water we use is drawn from. "With the lakes and rivers at their lowest stages due to the lack of rain, one would have to think that the resources in our water table are being depleted as well," Bowles said.

Bowles encouraged people to not use water unless they absolutely have to. That could mean a lot of yellow grassy yards around the county.

Last week the Office of the State Climatologist and the Kentucky Energy and Environment Cabinet, in coordination with the Kentucky Drought Mitigation Team, issued a Level 2 drought declaration for 24 counties in three Drought Management Areas (DMAs) in Western Kentucky. In addition, a Level 1 drought has been declared for 66 counties in nine DMAs.

A Level 2 drought indicates severe drought conditions have developed. Counties with this designation can expect severe impacts to water-sensitive enterprises; depletion of water supplies in shallow wells, springs and ponds; increased incidences of wildfires; higher demands placed on water treatment facilities; and the imposition of water conservation advisories.

A Level 1 drought indicates moderate to severe drought conditions have developed primarily affecting soil moisture and vegetation. Counties with this designation can expect reduced supplies of agricultural water and heightened risk of wildfires.

Counties included in the Level 2 drought declaration: Purchase DMA: Ballard, Calloway, Carlisle, Fulton, Graves, Hickman, McCracken, Marshall

Agriculture throughout the Commonwealth has taken the greatest impact by the lack of rainfall and above-normal temperatures, according to an official with the U.S. Department of Agriculture (USDA).

"Many farmers are reporting having to feed cattle because pastures are depleted," said Bob Finch, emergency preparedness coordinator at the USDA Kentucky State Farm Service Agency. "This will be a major financial drain if pastures do not improve this fall. Farmers in central Kentucky who normally planted double-crop soybeans cannot because the ground is so hard. Farmers in Western Kentucky are looking at record-low yields and in some cases a total failure."

Wildfires are rapidly becoming a major concern as fields and forests continue to dry out, aided by the high temperatures and low humidity.

"Summer is usually a time of few wildfires in Kentucky," said Leah MacSwords, director of the Kentucky Division of Forestry. "We need people to be extra careful with their outdoor activities so they don't cause an unintended wildfire."

Hydrologic problems continue to develop in the drought areas. Many streams and rivers are currently experiencing low-flow conditions. Kentucky Lake, Lake Barkley, Rough River Lake, Barren River Lake and Nolin Lake are all currently below normal pool. While these low lake levels are not likely to impact drinking water supplies obtained directly from the lakes, minimal dam releases during the summer could affect downstream water supplies as well as recreational activities on the lakes. Many small ponds and lakes are well below normal levels or are completely dry.

There are currently no water systems experiencing any water supply shortages. However, persistent drought can impact raw water availability or trigger unseasonably high water demands on a water system. All Kentuckians are encouraged to heed any requests for conservation from their local water supplier.

The National Weather Service's Climate Prediction Center is currently forecasting above-normal temperatures and below-normal precipitation in the 6-to-10-day and 8-to-14-day outlooks for the entire state. Any rain that falls this weekend is expected to be isolated and will not provide significant drought relief.

More information about drought declaration criteria can be found in the Kentucky Drought Mitigation and Response Plan at http://water.ky.gov/wa/Documents/State%20Plan_Final.pdf.

COUNTY NEWS

Fiscal Court Passes ATV Ordinance

By Michael Toon
Carlisle Weekly

The Carlisle County Fiscal Court meeting on July 3, 2012, began with the approval of the previous meeting's minutes and the ambulance report by Carlisle County Ambulance Director Wayne Floyd.

Floyd reported there were 69 advanced life support runs, 21 basic life support runs with 21 assists to county residents.

Floyd was relieved to report that funding was beginning to come in from the computer glitch that the ambulance service was facing. With the computer glitch resolved there was a lumps sum of over $60,000 brought into the ambulance service from regular funding and Medicare funding.

In the Emergency Management report Carissa Viniard reported that she has been attending classes to gain certification in different areas. The Carlisle County Fiscal Court next passed a resolution to designate Viniard as applicant agent for Homeland Security grants, as the new applicant agent and applicant for the rescues squad and all local fire departments.

In the jailers report Carlisle County Jailer Ronny Owens reported that there were two inmates in the Hickman County Correctional Facility and three inmates in the Ballard County Detention Center.

In the road report, Carlisle County Road Foreman Jerry Bowman reported that the Bridge work on CR 1002 has been completed and that work on CR 1016 will be commencing soon. The first round of paving money will be arriving soon as well.

The culvert on Morgan Road was replaced and paving over that gravel patch that currently is sitting on the road will be conducted this week.

Bowman next reported on mowing in the areas that were not sprayed at the beginning of the year. Bowman said that the praying has been effective, with little to no signs of Johnson grass. Bowman said the areas that were not sprayed will be soon mowed.

In the 911 report, Carlisle County Judge Executive Greg Terry said that the grant for the recycling trailers has been received and that the county should have them in five to six weeks. The current recycling trailer is in Milburn and with these three new trailers there will be a recycling unit in each town on Carlisle County.

Magistrate Sonny Pearson inquired about the county-wide dumpsters that were proposed at the last meeting and Judge Executive Terry told Pearson that the county is scheduling to put out dumpsters for everything but tires, for the month of August.

The fiscal court next approved an easement for Bardwell City Utilities so that they can extend their water re-routing project through the courthouse property. When the re-routing is executed the water system in Bardwell will be fully connected.

The second reading of the ATV Ordinance was discussed next. There were some complaints that the $150 was too steep of a price to pay for yearlong ATV riding. Judge Executive Terry told the fiscal court that residents would be able to pay for one day passes, one weekend passes, monthly passes or annual passes. "We are still in the discovery stage of this ordinance. We will see what works for the people and what doesn't work for the people. We are asking for patience in this matter," Terry said.

Terry said that in a meeting with the state tourism director in Frankfort, the people there were excited that ATV and horse riding trails were being planned for the area and that there was currently over $150,000 in grants available for tourism related projects such as these.

The Carlisle County Fiscal Court approved the moving of the next fiscal court meeting from the 17th to the 24th of July. Transfers and claims were approved and the Carlisle County Fiscal Court went into closed session to discuss possible litigation.

Carlisle County Man Facing Charges After Disturbing Endangered Bird Nest

Eggs and newly-hatched chicks of the endangered interior least tern are well camouflaged and difficult for people to see.

FRANKFORT, Ky. - A Carlisle County man who allegedly drove an ATV inside a protected area containing federally-endangered interior least tern nests was charged June 30 with disturbing nests and interfering with an officer.

Twenty-year-old Keaton Rathermel of Bardwell, Ky., also had his ATV seized pending court action, said Sgt. Denny Broyles of the Kentucky Department of Fish and Wildlife Resources.

Conservation officers with Kentucky Fish and Wildlife joined with special agents from the U.S. Fish and Wildlife Service to stake out a protected island just south of Wickliffe.

The island, a large sandbar in the Mississippi River, contains approximately 30 nesting pairs of interior least terns. Only an estimated 20,000 of these birds exist in the world; Kentucky hosts 800 to 1,000 pairs.

In Kentucky, interior least terns nest along sandbars and islands along the Ohio and Mississippi rivers from Louisville to Fulton County, said John Brunjes, migratory bird biologist with Kentucky Fish and Wildlife. Biologists have marked critical nesting areas with signs prohibiting visitation or vehicle use.

Interior least terns nest directly on the sand in shallow indentations. The camouflage coloration of the eggs and chicks make them difficult to see.

Officers recently set up surveillance on the island near Wickliffe due to ATV riding at the location and frequent destruction of warning signs.

On Saturday evening, June 30, Broyles said conservation officers observed Rathermel drive past a posted sign onto the protected island. Officers stopped Rathermel as he exited the island. Rathermel was charged with a violation of disturbing nests. Broyles said officers added a second charge of interfering with an officer, a misdemeanor, due to Rathermel's behavior and refusal to comply with an officer's request after being stopped.

Officials could not immediately determine whether any nests were destroyed during Saturday's incident. Brunjes said he has photographs taken the previous week of ATV tracks within a few feet of a nest.

"The last four nesting years have been bad ones for interior least terns because of high river levels," Brunjes said. "This has been a good year so far there are lots of sandbars available for nesting."

Biologists have documented and posted 18 islands this year with endangered tern nests on them. Boaters and pleasure riders should avoid all posted areas.

"We're planning to step up enforcement to help protect these areas," Broyles said. "The U.S. Fish and Wildlife Service is doing this as well. If someone is caught riding in a protected area, that person could face federal charges and jail time."

A July 18 court date has been set for Rathermel in Carlisle District Court.

GOING GOING GONE
ESTATE AUCTION
Thursday Evening, July 12th At 6:00 PM

Local Deaths

Samuel Doyle Edwards, 59

Mr. Samuel Doyle Edwards, age 59 of Bardwell passed away 9:56 AM Tuesday, June 26, 2012 at his residence. He was retired Chemical unloader from New Page after 38 years, member of Wickliffe Masonic Lodge F&AM #625, past Master of the Wickliffe lodge and member of Rizpah Shriners of Madisonville and Member of Scottish Rites and attended Faith Baptist Church of Wickliffe.

He is survived by his wife of 39 years, Kathy Allen Edwards of Bardwell; daughter, Wendy (Todd) Harrison of Bardwell; Mother, Dean Adkisson Yount of East Prairie, MO; Step-Father, Richard Yount of East Prairie, Mo; Step-Mother, Martha Edwards of Columbus, KY; Grandson, Ethan Harrison of Bardwell; Granddaughter, Georgia Harrison of Bardwell and several nieces and nephews. He is preceded in death by his Father, Howard Leroy Edwards; Daughter, Christy Delane Edwards and Sister, Joyce Lee Edwards.

Memorial Services were held 11 AM Saturday at the Brown Funeral Home in Clinton with Rev. Billy Prince, Jr. officiating. Masonic Rites were held at 10:30AM Saturday at the funeral home.

Donations: American Diabetes Association, 1701 North Beauregard Street Alexandria, VA 22311 or The Gideon's, P.O. Box 1325, Fulton, KY 42041.

Jessie Bernice Milner Harper, 84

Mrs. Jessie Bernice Milner Harper, age 84, of Clinton passed away 5 AM, Friday, June 22, 2012, at her residence. She was a member of Green Valley Missionary Baptist Church, worked as Nurse's Aide at Clinton-Hickman County Hospital and West KY Manor, and was a member of Shining Star #138 Order of Eastern Star.

She is survived by her Husband James Harper, Sr., 2 Daughters Al Jenoise Harper Mason of Clinton and Evelyn Baker of Clinton, 2 Sons James Harper, Jr. of Clinton and Reginald Harper of Clinton. 8 Grandchildren and 10 Great-grandchildren.

She is preceded in death by her Parents M.C. Milner and Monia Mae Dowd Milner Pate, Step-father George W. Pate 1 Sister and 1 Brother. Funeral Services were held 11 AM Friday at Green Valley Missionary Baptist Church in Clinton with Rev. Eugene McDonald and Rev. Tony Johnson officiating. Burial followed in the Clinton Cemetery.

Ronnie Lee Dixon, Sr., 62

Ronnie Lee Dixon, Sr., age 62, passed away at 5:15 p.m. on Friday, June 29, 2012, at his residence.

He was a retired U.S. Army veteran having served in Vietnam where he received a Purple Heart. He was a member of the Wickliffe Masonic Lodge #625, a member of the Rizpah Shrine of Madisonville, KY, a member of the York Rite of Paducah, and he was a member of the Wickliffe Eagles. He was of the Baptist faith.

He is survived by his son, Ronnie Dixon, Jr. and wife Deneen of Barlow; granddaughter, Desiree Dixon of Arlington; mother, Catherine Pool Dixon of Gage; sisters, Lorita Pickett and husband Tom of Tamms, IL, Kaye Talley and husband Stan of Gage; brother, William Dixon, Jr., and wife Christy of Paducah; stepgrandson, D.J. Woodford and wife Mindy; stepgranddaughter, Kimberly Woodford and fiancé Adnan Veljacic of Paducah; stepgreat-grandson, Kejlab "Tree Frog" Veljacic, Jr. of Paducah, and several nieces and nephews.

He was preceded in death by his father, William B. Dixon, Sr.; grandparents, King and Bernetta Pool and Charles and Mary Dixon.

Funeral services for Ronnie Lee Dixon, Sr., were held at 7:30 p.m. on Monday, July 2, 2012, at the Milner and Orr Funeral Home of Wickliffe with Rev. Larry Fraser officiating.

You may leave a message of sympathy or light a candle at www.milnerandorr.com.

John L. "Johnny" Willett, 57

John L. "Johnny" Willett, 57, of the Melber community died at 6:42 a.m. Friday at his residence.

He was a member of St. Jerome Catholic Church and retired from Continental General Tire in Mayfield.

He is survived by his wife, Karen Vermillion Willett; one daughter, Erica Barton of Hickory; one son, Bryan Willett of Paducah; his mother, Wilma Jean Willett of Fancy Farm; one sister, Donna Sue Garrett of Atlanta; one brother, Glenn Willett of West Virginia; and two grandchildren. He was preceded in death by his father, Connie Willett, and one sister.

Services were at 11 a.m. Monday at St. Jerome Catholic Church in Fancy Farm with Tony Jones officiating. Burial followed in the church cemetery. Brown Funeral Home in Mayfield was in charge of arrangements.

Alvin Moss, 86

Alvin Moss, 86, of Arlington died at 10:10 a.m. Wednesday at his home.

He was a World War II Army veteran.

He is survived by two grandchildren, Matthew Mikel of Springfield, Mo., and Ashley Mikel of Denver; one great-grandchild; and several nieces and nephews.

He was preceded in death by his wife, Rachel Moss; one daughter, Marilynne Moss Griffin; one sister, Francis Pate; and two brothers, Calvin Moss and Gene Moss. His parents were George and Eunice Keene Moss.

A memorial service will be held later. J.H. Churchill Funeral Home is in charge of arrangements.

CITY OF BARDWELL, KENTUCKY
ORDINANCE NO. 82-2012

AN ORDINANCE INCREASING THE RATES FOR SEWAGE USAGE IN ACCORD WITH FEE INCREASE CONVEYED BY KENTUCKY RURAL WATER DISTRICT

SUMMARY

The City of Bardwell recently received notice from the Kentucky Rural Water District that the City's cost of providing water to residents for sewage operation would increase. After thoroughly discussing the matter and examining the City's budget, the City Council reluctantly voted to approve an increase in sewage rates to account for the greater operation costs. Ordinance number 82-2012 increases the minimum fee charged per month for sewage usage to $20.00 for the first 2,000 gallons of water used per month. In addition, any 1,000 gallons used monthly thereafter will be charged at the rate of $7.00.

Copied below is the full text of each section of the ordinance imposing a tax or fee, as required by law:

Therefore, the City of Bardwell, after evaluating the City budget, hereby reluctantly approves an increase in the minimum fee charged per month to residents for sewage-system usage. Specifically, customers shall pay $20.00 for the first 2,000 gallons of water used, and $7.00 per any 1,000 gallons used thereafter each month.

Philip King
Mayor

Sue Ann Tolbird
City Clerk

I, Jason Batts, hereby certify that I am an attorney licensed to practice law in the Commonwealth of Kentucky. I further certify that the foregoing summary of Ordinance No. 82¬2012, of the City of Bardwell, Kentucky, was prepared in accordance with the requirements of KRS 83A.060, and is a true and accurate summary of the contents of said Ordinance.

Jason Batts
Bardwell City Attorney

WEEKLY VOICES

MISSISSIPPI NEWS

By Nancy Wilson
July 1

Visitors are always welcome to all our church services. Sunday morning, Men's Prayer Meeting starts at 9:15. Sunday School starts at 9:45. Worship service is still the same time at 10:50. Sunday night preaching service is at 6:00. Wednesday night meal is at 6:00, students and adult Bible study and prayer meeting is at 7:00.

Sunday morning the call to worship was "The Star-Spangled Banner" and we said the pledges to the American and Christian flags. The choir special was "Have Faith In God". Bro. Jason read from Mark 5:36 and the subject was "Faithful ". Bro. Mark read from Acts 2:1-13 and the subject was "Freedom In Jesus ."

Sunday afternoon at 2:00 the church went to Countryside for our monthly service. The students sang and Bro. Mark brought a devotion. We are always glad to see everyone at these services.

Sunday night was Student night. They lead the congregation in the music. They sang "I Shall Not Be Moved" for their special music. Bro. Jason gave a time to have group time with the students. He read from Philippians 2:12-18 and the subject was "Are We Lights In The World?" There was a fellowship afterwards to celebrate July birthdays and anniversaries.

Wednesday night we will have devotion at 7:00 p.m., fish fry and hopefully fireworks.

Saturday at 4:00 there will be an ordination for Bro. Kevin Riley at Mississippi. He has accepted the pastorate of Antioch Baptist Church. A fellowship will follow. You are invited to come and join us.

We wish a Happy Birthday to Tommy Woodruff, Jr., Bradley Morgan, Mary Beth Bishop, Judy Prince, Nicholas Case, and Mrs. Rachel Johnson will be 97 on July 10. She is at Countryside and I am sure she would appreciate cards.

We wish a Happy Anniversary to Bro. Ray and Shirley Provow, Gary and Theresa Owens, Gary and Pam Thomas, and Gerald and I will have one July 22.

Pray for all the sick and injured: James and Pat Burpo, Ernie Brown, Gary B. Owens, Lavada Bean, Tommy Woodruff, Brandy Russell, Debbie Crider, Edward Bugsby, Earl and Mary Wallace, David Huff, Bro. Ray Provow, Susie Webb, Jean Terry, Beverly Barnhill, Jade Cain, Marshall and Patty Higgs, Sue Burpo, Sue Bobo, James Galloway, Betty Molln, Destiny Wilson, Edwina Petrie, Howard Sims, Ronny Burge, Betty McGee, Juett Polivick, Cecil Polivick, Will Ben Martin, Dale Terry, Josh Bryant, Norma Cates, Robert Hendrix, John Mike Ford, John Pace, Russell Turnbow, Charlie Cannon, Gary Duncan, Danny Duncan, T.C. Carder, Kathy Mason, Valarie Davis, Gail Carder, Tammy Edwards, Howell Cannon, Steve Cannon, Gilbert Nichols, Mary Jo Langston, Megan Story, Glyn Gupton, Chris Burpo, Ann Anderson, Melissa Green, Rachel Johnson, Maxine Todd, Mary Williford, Gracie King, Irene Wooley, Ina Sue Edrington, Susie Bowden, Rozella Goode, Bro. W.A. Bugg and all at the Nursing Homes.

Pray for rain, the devastation of fires, floods, and the storms.

We express our sympathy to the family of Sam Edwards.

ONE PRESSON'S VIEW

By Kay Presson

As we endure the terrible heat wave, I am reminded of how we coped with heat in my childhood. And, those of you who are my age and older, as you read this, remember your childhood and how we coped.

Two of the homes my family lived in were Thomas Jefferson Apartments and Elmwood Court in Paducah. In the winter, the apartments were warm, for they had radiators that provided warmth.

In the summer, we had no air conditioners...no fans, and yet, we survived. The cars and trucks had no air conditioning, just windows which we rolled down.

Both Thomas Jefferson and Elmwood Court, during the hot summer months, had an area with sprinklers for us kids. We would stand under the overhead sprinklers and cool off. Had we ever heard of air conditioning? Good grief, absolutely not. In fact, when visiting my aunt and uncle, Eleanor and Roy Mahan, who lived on Hovecamp Road, I noticed they had a window fan. Folks, I thought they were millionaires, 'cause no one we knew even had stand alone fans, much less window fans.

It's a wonder we survived...we were not tougher, we were just not "conditioned to air conditioning."

Congratulations, Carlisle Weekly....you are 16 years old this month!

From Father's Heart To Yours By Ralph and Pamela Hale

Manifest Your Glory

The word glory is found in scripture a multitude of times, sometimes it is referring to how prominate or wealthy someone is. But most of the time it is referring to the showing forth of God's presence, power and works.

Isaiah saw God's glory as and Moses and others. Isaiah responded by declaring his uncleanness and the people round him. But the work of God's glory cleansed Isaiah and God ask who can I send to be my messenger. Isaiah's reply, "Here am I send me" (Is. 6) The glory of God manifested will always have a cleansing effect and also a humbling so that we are ready to say with Isaiah, "here I am, send me."

In John 2 we find the story of Jesus turning water into wine. This is called a miracle and that it manifests the glory of God for they are for His glory and no one else's.

Jesus said when we see Him we see the one that sent Him. (John 12:45) Then Paul writes that Christ in us is our hope of glory. This glory in us is not just reserved for us when we leave this world and go to heaven. It is that we have the one in us that is greater than all life's problems, sins and difficulties. Greater is He that is in us than he that is in the World.

When praying in John 17, Jesus that He is glorified in those that believe in Him. <v. 10> If this is true, and we know it is, there must be some involvement on our part. In v. 1 Jesus prays, "Father glorify thy son that thy Son may also glorify thee."

We being sons and daughters of God by new birth must be able to pray and see God glorified in us just as Jesus did. When Jesus prayed this prayer, He was indeed a submitted Son to God's will. The life then that is surrendered to the will of God is one that will glorify God!

Jesus said the He did all things always that please the Father. He said He finished the work God gave Him to do. So when we are submitted to God's will and surrendered to doing what God has for us to do, not quitting before we are finished we are in truth glorifying God!

Jesus' submission included the cross. Without the cross there would be no salvation for us. In Hebrews 12 Paul writes again that Jesus endured the suffering and shame for the joy that was set before Him, and that we should be looking unto Jesus. Fulfilling the will of God was not all fun and games. It wasn't just doing miracles and feeding the multitudes and casting out devils. It involved being crucified!

Jesus said for us to take up our cross and follow Him daily. Paul wrote, "I die daily; I am crucified with Christ, yet I live but the life I now live in the flesh I live by the faith of the Son of God." So then the flesh that is crucified with its lust and will is one that glorifies God.

I see this as not only an act of obedience but also an act of determined will. A carnal mind will resist this but a spiritual mind will desire it. Remember, there can be no resurrection without crucifixion! If we want to walk in newness of life, in the power of the resurrection, we must be crucified!

Then we must become more at home in heaven than we are here on earth because heaven has become more real! This will come by eating, meditating, talking and living God's Word. It will put us in touch with our origin, God's heart and then we will say with Jesus, "I'm going back to where I was before!" Come on and go with me!

This week's inspiration

This week's inspiration from scripture verses Mark 4:35-41: A New York City lab claims to have bottled trust out of a naturally occurring odorless hormone. Common sense tells us that this is nuts. However, trusting people does involve biology and chemistry. What causes us to place our trust in someone? In the story told in these scripture verses, the waves were tall that night. The disciples awakened Jesus to tell Him that the boat was about to sink. He commands the winds to be still and they did. The disciples were stunned. Then Jesus asked them why there were afraid, where's your trust? We want to have trust and faith but sometimes it's hard. Sometimes it might seem easier if we could spray on some liquid trust. Jesus' miracle was calming the disciples during the storm – not calming the storm itself. Jesus is capable of delivering us through all the storms of life. We trust Him because He has demonstrated His love for us.

AREA NEWS

County Employees Could Face Possible Litigation

A law suit has been filed in Carlisle County Circuit Court stating that the Carlisle County Ambulance Service was negligent in their care for a patient.

A number of county employees, including a dispatcher, emergency services director and emergency responders, are being sued by the family of William Byars Stermon of Milburn.

Stermon was involved with a head-on collision with another vehicle in May of 2011, when the lawsuit claims that it took 66 minutes at the scene to get Mr. Stermon loaded into the ambulance and to the hospital, making the total time to the hospital at 90 minutes.

The main argument at the heart of this case is that the family argues that medical services were not dispatched in a "reasonable time" and that the 9-1-1 center worker "dispatched emergency medical services in the wrong direction."

The family of William Byars Stermon also believes that in addition to the delay in response time, the emergency medical workers who responded to the scene were not properly prepared or trained. For example, the attorney said one of the workers stated during the emergency that he forgot to refill the oxygen tanks needed at the scene.

This story used excerpts and information from a WPSD NewsChannel 6 story.

MY MOST REWARDING 4-H EXPERIENCE

BY: ALEX TOON

Being on the Kentucky 4-H State Teen Council has been one of the most challenging, but also one of the most rewarding 4-H experiences I've had.

It requires you to give up four weekends out of your year, when you plan for state events such as Teen Conference and Teen Summit. I've met many amazing people and become a better leader.

This past June I had the privilege of attending State Teen Conference in Lexington, KY for the 3rd year. Teen Conference is a kind of 4-H camp for teens, only it's not at a camp, it's on a college campus—UK!.

This is where the State officers are chosen. At Conference you participate in activities such as tracks, workshops, dances, and county night out. Tracks and workshops are classes you choose. There are two dances in this fun-filled week! During District Night Out you get to play laser tag, mini-golf, and skate.

This year at Conference District 7 had three candidates running for office. Although none of them won, I had the opportunity to campaign all week for Brittany Osborne from McCracken County.

So readers, you may be asking yourselves, "Why should I attend STC in June, 2013?" It's four fabulous days on one of KY's great university campuses- actually I think it's the best. And I've always seen at least one UK basketball player at each STC I've attended. I even sat across from Josh Harralson at one meal (I was disappointed that we were sitting back to back!)

Well, my Top Ten Reasons are:

Five Reasons For Teens:

1.You will meet some of the best 4-Hers in our state

2.You will even learn something new and it won't seem like schoolwork.

3.You will get in great physical shape-walking all over the UK campus and running up the stairs to get your nametag. (Don't leave the dorm without it!)

4.You will get to vote for the four KY State officers - you actually get a say in something for a change.

5.You will get out of Carlisle County! You'll have a social life! Two evening dances and a fun filled district night out at Champs with laser tag, roller skating and a snack bar.

So readers, I hope I've given you something to think about for June, 2013.

OK, teens, now it's time to stop reading- this info is for parents only!

Five Reasons Parents Can Benefit By Sending Their Teen to STC:

1.It builds self-esteem in your child.

2.Teens sample one week at UK campus, staying in a dorm.

3.Teens are responsible for their belongings and being punctual. (getting to workshops on time).

4.It allows your child to enlarge their circle of friends.

5.Parents get a break from hearing, "I'm bored, there's nothing to do in Carlisle County!"

So parents, I think it's the best money you could spend on a four day conference in 4-H. And your child might even be the president one day, of KY 4-H that is!

Jackson Purchase ACA to Merge With Chattanooga Ag Credit

Jackson Purchase ACA and Chattanooga AgCredit will become River Valley AgCredit on July 1, as part of a merger between the two associations.

The merger was approved by the stockholders of each association at a Special Stockholder's Meeting that took place on May 18th, which paved the way for the U.S. Farm Credit Administration to grant final approval in June.

Jackson Purchase ACA includes 8 service centers that cover the 8 counties in the Purchase Area including Carlisle, Hickman, Fulton, Ballard, Calloway, Marshall, Graves, and McCracken. Chattanooga AgCredit has 6 service centers that serves 12 counties including Marion, Sequatchie, Bledsoe, Hamilton, Rhea, Roane, Melgs, Bradley, McMinn, Loudon, Polk, and Monroe.

The merger offers risk mitigation through diversification which increases economic capital and the ability to offer continued competitive rates. No offices will be closed as part of the merger.

The new association will be led by Jackson Purchase ACA CEO Stan Brunston. Gary Keith, Chattanooga AgCredit CEO, will be the new association's Chief Operating Officer.

River Valley AgCredit will remain a member-owned cooperative and part of the nationwide Farm Credit System, providing financing for agriculture and rural living since 1917.

Drinking Water Wells Sought for Groundwater Study

FRANKFORT, Ky. (June 28, 2012) – The Kentucky Division of Water (DOW) is seeking permission from owners and/or users of private drinking water wells statewide to obtain groundwater samples.

The project is part of a targeted study to determine if domestic water wells are being impacted by human-influenced pollution and/or events of nature. Owners of wells selected for inclusion in the study will receive free testing of their well water.

Water collected from water wells will be tested for Escherichia coli (E. coli) and total coliform bacteria that are found in untreated human and animal wastes, as well as for the presence of iron-related bacteria, sulfate-reducing bacteria and slime-forming bacteria. Samples will also be tested for caffeine.

Phil O'dell, a geologist with the DOW Groundwater Section, said contamination of well water can be a one-time event or a continuous problem, depending on the circumstances surrounding the particular well.

"Bacteria may enter a well through repair work or flood conditions, in which case a one-time disinfection generally takes care of the problem," O'dell said. "In other cases bacteria may be seeping in from a leaking septic tank nearby, in which case a finding of caffeine would be a good indicator that wastewater going down a kitchen drain is bypassing the septic tank and entering the groundwater."

Owners whose wells are found to be positive for bacteria will be advised on well disinfection procedures and, if needed, the use of continuous water treatment methods such as filtration, chlorine feeding and use of ultraviolet light for water treatment.

While public drinking water supplies are regulated by the Commonwealth of Kentucky under the Clean Water Act, private water supplies are not regulated by state or federal law. Unlike the regular monitoring of public drinking water systems serving many people, there are no experts regularly checking the water coming from private wells. These households must take special precautions to ensure the protection and maintenance of their drinking water supplies.

"If your drinking water comes from a private well, you as the well owner or user are responsible for the water's safety," said David Jackson, supervisor of the DOW Groundwater Section, which is performing the well water study. "Our agency and the U.S. Environmental Protection Agency recommend that well users test their well water annually for bacteria, nitrates/nitrites and any other contaminants of local concern."

Jackson added that testing should occur more frequently if:

- there is a change in the taste, odor or appearance of the water.
- well breakage or repairs have taken place.
- a household member or guest experiences gastrointestinal illness.
- an infant lives in the home.

Owners and/or users of private drinking water wells who would like to participate in the study should contact Susan Mallette at DOW at 502-564-3410 or by email at Susan.Mallette@ky.gov.

For more information about drinking water well care and maintenance, visit the EPA website at http://water.epa.gov/drink/info/well/. To obtain a list of certified water testing laboratories, visit http://water.epa.gov/scitech/drinkingwater/labcert/statecertification.cfm.

PUBLIC NOTICE

The Obion Creek Watershed Conservancy District, Board of Directors, will meet Tuesday Morning, July 10th at 7:30 A.M., in the USDA Service Center, Conference Room, Clinton. The public is invited to attend.

REQUEST FOR BIDS

The Carlisle County Fiscal Court will accept bids for the roof replacement at the Milburn Gym. The work requires the installation of a new metal roof. Metal roof must have forty year warranty on the finish. Additionally, the roof must be ribbed where the bow shaped truss can be followed without bending the metal and utilize a cap designed for bow shaped roofs.

Bubble wrap insulation must be installed under the roof material. All work must pay prevailing wage and all materials must meet the requirements of the Buy American program.

A copy of the appropriate wage rate, the required Buy American certification, and other information pertinent to the work may be obtained at the office of the County Judge/Executive in the Carlisle County Courthouse, 985 U.S. Highway 62, Bardwell, Kentucky 42023 or by calling Brandi Webb at 270-628-5451.

The facility will be open on July 6, 2012 at 10:00 a.m. for a mandatory meeting with any interested bidders to inspect the roof and ask any questions. Bids will be accepted until 9:30 a.m. on Wednesday, July 11, 2012 at the above address at which time they will be opened and read aloud. Successful offeror will be determined by lowest and best offer. All bids must be submitted in a sealed envelope marked "Bid". The Carlisle County Fiscal Court reserves the right to refuse any or all bids and waive informalities in the bid process

Trip of a Lifetime

Strangers Who Become Best Friends Take River Trip of a Lifetime

Richard Sturtevant (left) and Sam Edwards (right) during their journey down the Mississippi River

The boat that would take Sam and Richard down the river before it was loaded into the water at Wickliffe

Richard (left) was in charge of cooking, while Sam was in charge of navigating the boat

The cooking tools that were used on the trip overlook the river

EDITORS NOTE: ***The Carlisle Weekly was saddened to hear about the passing of Sam Edwards.***

While I didn't know Sam, the day he spent with me in my office left a great impact on me. I admired his sense and thirst for adventure.

In honor of Sam and his adventurous spirit and with it being Independence Day I am going to re-run the story of Sam and his friend Richard Sturtevant's adventure of independence.

By Michael Toon
Carlisle Weekly

A friendship that began by chance on the sandy beaches of the Florida Keys turned into the journey of a lifetime last year.

Bardwell, Kentucky, native Sam Edwards was visiting the Florida Keys in 1991 when he met a man by the name of Richard Sturtevant from Springfield, Massachusetts.

Mr. Sturtevant and his wife, along with Mr. Edwards and his wife, took the same trip to the Florida Keys at the same time after that and developed a friendship with each other and their families.

Their friendship grew to the point where Edwards and Sturtevant purchased 25 acres of hunting land in Kentucky, and every fall Sturtevant and his wife would make the trip to Kentucky to hunt and visit with the Edwards.

It was during a visit to the Florida Keys in 1992 Edwards and Sturtevant began discussions on a special boat trip. Sturtevant always wanted to take a trip on a house boat and Edwards always had a great love for the river.

In 1992 Edwards began gathering items here and there; 55 gallon drums, odds and ends, pieces in the thoughts and hopes of building his own houseboat that he and Sturtevant would take on a journey from Wickliffe, Kentucky, to New Orleans.

When this idea began, Sam Edwards contacted a friend of his by the name of James Mariner from Wickliffe. Mariner figured and drew up plans for the boat, calculating how much weight Edwards and Sturtevant would be carrying down the river with their supplies they were planning on taking, and how many barrels were needed to safely float the homemade house boat. "James Mariner is one of the smartest men I know, and sure enough when we sat the houseboat in the water it floated on the exact line that he told us it would.

The boat, constructed of twenty three 55 gallon drums by Sam Edwards and his son-in-law Todd Harrison, measures eight feet wide by 20 foot long at the base. The boat housed an 8x8 sleeping cabin, complete with screened in windows and doors. The boat also included a kitchen area on the front deck and had three burner gas stoves that were left over from the 2009 Ice Storm. In the end the only things that Edwards and Sturtevant purchased with their own money to construct the boat were a used 25 horsepower Johnson outboard motor and five 2x12 boards for the bottom of the boat. The rest of the materials were salvaged and collected over the previous eight years.

Upon the completion of the houseboat Edwards and Sturtevant gathered all their supplies and set sail on September 13, 2010, out of Wickliffe, Kentucky, with the intended destination of New Orleans, Louisiana.

As their journey began the m en enjoyed the scenery of the river. Edwards kept busy navigating the boats and taking care of the steering of the ship, while Sturtevant kept meals, three times a day, cooked and ready. "Richard is a great cook, we had three great meals a day," Edwards said.

The two men encountered many people on the river, people from local fishermen, to tug boat operators, river workers, to riverboat casinos. "We met our biggest crowd at the riverboat in Caruthersville. There were a lot of people taking our picture and were just curious about the boat we were in and why we were doing what we were doing. All were some of the friendliest people you would ever want to meet," Edwards said.

The trip was not without its adversities. Edwards said that when the trip began he was planning on bringing a map of the river that his mother had made during the years that she worked on the river cooking for barge workers. However, that map was accidently left behind. "For the majority of the trip we had no clue where we were at. We used the signal buoys on the river that told us how many miles away from New Orleans we were," Edwards said. Edwards said the only time that they knew exactly where they were at was when they crossed the bridge in Dyersburg, Tennessee.

Another bit of adversity was the construction of the boat. Edwards and his consultant Mariner had correctly gauged the amount of barrels needed to properly float down the river. However, at the front of the boat the ends were blunt or squared ends, where they should have been pointed ends.

With the blunt ends at the front of the boat Edwards had to constantly adjust the steering of the boat and with the blunt ends travel was a lot slower than expected. "We calculated that we would travel 50-60 miles a day, but with the blunt ends we only traveled 20 miles a day," Edwards said.

Despite those adversities Edwards and Sturtevant enjoyed the slow ride down the river and taking in the scenes that the Mississippi River had to offer. Edwards remembers Arkansas and how remote and desolate the area was, and he remembered the steam stacks at New Madrid.

The trip hit its final bit of adversity some 30 miles north of Memphis, Tennessee, when Edwards left the boat to tie the boat to the bank. Edwards made a misstep and in essence, crushed his foot. Edwards and Sturtevant found out from a local fisherman that they were 30 miles away from Memphis.

Both men made the decision that with Edwards' foot in the condition it was in, medical attention was needed. The foot was later amputated.

Coming into the city of Memphis, Edwards and Sturtevant were greeted by the famous row houses that line the river coming into the city. Edwards and Sturtevant were greeted by a local kayaker and were instructed to tie up at Wolf River in Memphis, the place where their journey ended, some 400 miles short of their goal. Both men rented a van and headed back home, where Edwards received medical attention for his foot.

When looking back on the trip, Edwards and Sturtevant both said that despite coming up short on their planned destination, the trip was still a trip of a lifetime. "I had great fun, I had a chance to spend time with my best friend, Sam Edwards, and see the river first hand. It's something I will never forget. Whenever you are with Sam it's an adventure. He is by far a great guy and a great friend," Sturtevant said.

Edwards remarked on the accomplishment as well. "How many people in this time and age can say that they made a trip down the Mississippi River in the way we did it?", Edwards asked.

The two men plan on finishing what they started and travel to New Orleans. This time they will take a regular pontoon boat.

As for the seaworthy, handmade vessel that took the two random strangers that met in Key West, Florida, and later became best friends to Memphis, Tennessee? Edwards gave the boat to a riverboat employee who let his children use it for recreational purposes. The boat is still sitting in Memphis, Tennessee; 80 feet high, stranded on the banks of the Wolf River after summer flooding left it there.

CARLISLE SENIOR CITIZENS

FRIDAY JULY, 13 2012

FUNDRAISER

AUCTION AND SUPPER

DOORS OPEN AT 4:00-$1.00 TO GET IN THE DOOR

SUPPER AT 4:30- $5.00-CHILI, HOTDOG, CRACKERS, BROWNIE, TEA OR LEMONADE

AUCTION STARTS AT 6:.00

FOR SALE

10 FOOT STOCK TRAILER - $2,200
DOCTOR'S BUGGY - $3,000
ONE SET HAMES AND COLLER
BUGGY HARNESS - $250

270-642-2467

NOTICE

Notice is hereby given that Kentucky Utilities Company seeks approval by the Public Service Commission, Frankfort, Kentucky of an adjustment of electric rates and charges proposed to become effective on and after August 1, 2012, subject to the "Stay-Out" Commitment in Article I.1.1 of the Settlement Agreement approved in September 30, 2010 Public Service Commission Order in Case No. 2010-00204, under which the change in rates may be filed with the Public Service Commission during 2012, but not take effect before January 1, 2013.

KU CURRENT AND PROPOSED ELECTRIC RATES

Residential Service - Rate RS

	Current	Proposed
Basic Service Charge per Month:	$8.50	$13.00
Energy Charge per kWh:	$0.06987	$0.07235

Volunteer Fire Department Service - Rate VFD

	Current	Proposed
Basic Service Charge per Month:	$8.50	$13.00
Energy Charge per kWh:	$0.06987	$0.07235

General Service - Rate GS

	Current	Proposed
Basic Service Charge per Meter Per Month:		
Single-Phase	$17.50	$20.00
Three-Phase	$32.50	$35.00
Energy Charge per kWh:	$0.08332	$0.08678

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads. Also clarifies that a customer taking service under this rate schedule who ceases to take service hereunder must meet eligibility requirements of new customer to again take service under this rate schedule.
Determination of Maximum Load: New provision states how maximum load will be measured.

All Electric School - Rate AES

	Current	Proposed
Basic Service Charge per Meter Per Month:		
Single-Phase	$17.50	$20.00
Three-Phase	$32.50	$35.00
Energy Charge per kwh:	$0.06670	$0.07060

Availability of Service: Text change clarifies that customer taking service under this rate schedule who later ceases to take such service may not again take service under this rate schedule because it is closed.

Power Service – Rate PS

Secondary Service	Current	Proposed
Basic Service Charge (per Month)	$90.00	$90.00
Energy Charge (per kWh)	$ 0.03300	$ 0.03349
Demand Charge (per kW per month of billing demand)		
Summer Rate (May through September)	$13.90	$14.40
Winter Rate (All Other Months)	$11.65	$12.10

Primary Service	Current	Proposed
Basic Service Charge (per Month)	$90.00	$125.00
Energy Charge (per kWh)	$ 0.03300	$ 0.03349
Demand Charge (per kW per month of billing demand)		
Summer Rate (May through September)	$13.72	$ 14.75
Winter Rate (All Other Months)	$11.45	$ 12.73

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads. Also clarifies that a customer taking service under this rate schedule who ceases to take service hereunder must meet eligibility requirements of new customer to again take service under this rate schedule.

Time-of-Day Secondary Service Rate TODS

	Current	Proposed
Basic Service Charge (per Month)	$200.00	$200.00
Energy Charge (per kWh)	$ 0.03490	$ 0.03590
Maximum Load Charge (per kW per month)		
Peak Demand Period	$ 3.89	$ 4.50
Intermediate Demand Period	$ 2.43	$ 2.80
Base Demand Period	$ 3.05	$ 3.50

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads.

Time-of-Day Primary Service Rate TODP

	Current	Proposed
Basic Service Charge (per Month)	$300.00	$300.00
Energy Charge (per kWh)	$ 0.03522	$ 0.03557
Maximum Load Charge (per kVA per month)		
Peak Demand Period	$ 3.67	$ 4.30
Intermediate Demand Period	$ 2.31	$ 2.70
Base Demand Period	$ 1.28	$ 1.60

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads.

Retail Transmission Service Rate RTS

	Current	Proposed
Basic Service Charge (per Month)	$500.00	$750.00
Energy Charge (per kWh)	$ 0.03414	$ 0.03408
Maximum Load Charge (per kVA per month)		
Peak Demand Period	$ 3.54	$ 3.90
Intermediate Demand Period	$ 2.30	$ 2.90
Base Demand Period	$ 0.85	$ 1.30

Availability of Service: Text changes clarify that demand component of eligibility for taking service under this rate will be calculated on 12-month average of monthly maximum loads.

Fluctuating Load Service – Rate FLS

Primary Service	Current	Proposed
Basic Service Charge (per Month)	$500.00	$750.00
Energy Charge (per kWh)	$ 0.03419	$ 0.03419
Maximum Load Charge (per kVA per month)		
Peak Demand Period	$ 2.30	$ 2.40
Intermediate Demand Period	$ 1.41	$ 1.44
Base Demand Period	$ 1.57	$ 1.75

Transmission Service	Current	Proposed
Basic Service Charge (per Month)	$500.00	$750.00
Energy Charge (per kWh)	$ 0.02947	$ 0.03092
Maximum Load Charge (per kVA per month)		
Peak Demand Period	$ 2.30	$ 2.40
Intermediate Demand Period	$ 1.41	$ 1.44
Base Demand Period	$ 0.82	$ 1.00

Current:
Where:
1) the monthly billing demand for the Primary Peak and Intermediate Demand Periods is the greater of:
 a) the maximum measured load in the current billing period, or
 b) a minimum of 60% of the highest billing demand in the preceding eleven (11) monthly billing periods, and

 the monthly billing demand for the Primary Base Demand Period is the greater of:
 a) the maximum measured load in the current billing period but not less than 20,000 kVA, or
 b) a minimum of 75% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
 c) a minimum of 75% of the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.
2) the monthly billing demand for the Transmission Peak and Intermediate Demand Periods is the greater of:
 a) the maximum measured load in the current billing period, or
 b) a minimum of 40% of the highest billing demand in the preceding eleven (11) monthly billing periods, and

 the monthly billing demand for the Transmission Base Demand Period is the greater of:
 a) the maximum measured load in the current billing period but not less than 20,000 kVA, or
 b) a minimum of 40% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
 c) a minimum of 40% of the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.

Proposed:
Where:
the monthly billing demand for the Peak and Intermediate Demand Periods is the greater of:
 a) the maximum measured load in the current billing period, or
 b) a minimum of 50% of the highest billing demand in the preceding eleven (11) monthly billing periods, and

 the monthly billing demand for the Base Demand Period is the greater of:
 a) the maximum measured load in the current billing period but not less than 20,000 kVA, or
 b) a minimum of 75% of the highest billing demand in the preceding eleven (11) monthly billing periods, or
 c) a minimum of 75% of the contract capacity based on the maximum load expected on the system or on facilities specified by Customer.

Street Lighting Service - Rate ST. LT.
and
Private Outdoor Lighting - Rate P. O. LT.

Street Lighting Service (Rate ST.LT. – Sheet No. 35) and Private Outdoor Lighting Service (Rate P.O.LT. – Sheet No. 36) are being reorganized into two rate schedules. The first schedule will be named Lighting Services (Rate LS) and will be a consolidation of lighting fixtures currently offered. The second schedule will be named Restricted Lighting Service (Rate RLS) and will be a consolidation of lighting fixtures that are in service but no longer available for new or replacement installations. The current and proposed rates are presented below based on the lights to be included in Rate LS and Rate RLS. The lights proposed to be contained in the specific schedule are shown in bold type with the current light and rate sheet shown below the proposed light.

Proposed Lighting Service Rate LS

Lighting Energy Service Rate LE

	Current	Proposed
Energy Charge per kWh:	$0.05647	$0.05958

Traffic Energy Service Rate TE

	Current	Proposed
Basic Service Charge per Month:	$3.14	$3.25
Energy Charge per kWh:	$0.07182	$0.07614

Dark Sky Friendly Rate DSK

Current Rate

DSK Lantern	4,000	.050	$21.31
DSK Lantern	9,500	.100	$22.22

Proposed Rate
This rate schedule is proposed to be included in Lighting Service Rate LS.

Cable Television Attachment Charges – Rate CTAC

	Current	Proposed
Attachment Charge per year for each attachment to pole:	$5.40	$10.01

Curtailable Service Rider 10 – Rider CSR10

	Current (per kW)	Proposed (Per kVA)
Monthly Demand Credit:		
Primary	($5.50)	($2.80)
Transmission	($5.40)	($2.75)
Non-Compliance Charge:	$16.00	$16.00

Proposed Contract Option: Removes restriction that KU may only use physical curtailment during system reliability events. Also changes contract options' demand from a 15-minute demand basis to the one the customer's standard rate schedule uses.

Curtailable Service Rider 30 – Rider CSR30

	Current (per kW)	Proposed (Per kVA)
Monthly Demand Credit per kW:		
Primary	($4.40)	($2.30)
Transmission	($4.30)	($2.25)
Non-Compliance Charge per kW:	$16.00	$16.00

Proposed Contract Option: Removes restriction that KU may only use physical curtailment during system reliability events. Also changes contract options' demand from a 15-minute demand basis to the one the customer's standard rate schedule uses.

Load Reduction Incentive Rider – Rider LRI

Current Rate	Up to $0.30 per kWh
Proposed Rate	This rate schedule is proposed to be eliminated.

Standard Rider for Excess Facilities – Rider EF

Current Rate

Customer shall pay for excess facilities by:	
Monthly Charge for Leased Facilities:	1.54%
Monthly Charge for Facilities Supported By a One-Time CIAC Payment:	0.74%

Proposed Rate
No adjustment in the monthly charge for a replacement of facilities will be made during the initial five (5) year term of contract.
Customer shall pay for excess facilities by:
(a) Making a monthly Excess Facilities charge payment equal to the installed cost of the excess facilities times the following percentage:
Percentage with No Contribution-in-Aid-of-Construction 1.28%
(b) Making a one-time Contribution-in-Aid-of-Construction equal to the installed cost of the excess facilities plus a monthly Excess Facilities Charge payment equal to the installed cost of the excess facilities times the following percentage:
Percentage with Contribution-in-Aid-of-Construction 0.49%

Standard Rider for Redundant Capacity Charge – Rider RC

	Current (per kW)	Proposed (Per kVA)
Capacity Reservation Charge per Month:		
Secondary Distribution	$0.85	$1.55
Primary Distribution	$0.68	$0.99

Standard Rider for Supplemental or Standby Service – Rider SS

	Current (per kW)	Proposed (Per kVA)
Contract Demand per month:		
Secondary	$6.54	$12.91
Primary	$6.17	$12.35
Transmission	$5.99	$11.17

Availability of Service: Text addition clarifies that KU has no obligation to supply non-firm service to a customer-generator unless the customer seeks supplemental or standby service under Rider SS. This requirement does not apply to Net Metering Service (Rider NMS).

Temporary and/or Seasonal Electric Service Rider TS

Availability of Service: Text change clarifies that service is available when it is not necessary for KU to install permanent facilities.
Conditions: Customer will pay for non-salvageable materials plus a monthly charge for the salvageable equipment at the Percentage With No Contribution in-Aid-of-Construction specified on the Excess Facilities Rider.

Real-Time Pricing Rider RTP

Current Rate: Billing under this Rider is formulaic.
Proposed Rate: This rate schedule is proposed to be eliminated.

Standard Rate for Low Emission Vehicle Service – Rate LEV

	Current	Proposed
Basic Service Charge per Month:	$8.50	$13.00
Energy Charge per kWh:		
Off-Peak Hours	$0.04904	$ 0.05078
Intermediate Hours	$0.07005	$ 0.07254
Peak Hours	$0.13315	$ 0.13788

Availability of Service: Clarifies that rate is available to customers eligible for Rate RS or GS where the GS service is used in conjunction with an RS service to provide service to a detached garage and energy usage is no more than 300 kWh per month.

Meter Test Charge

Current Rate	$60.00
Proposed Rate	$75.00

Disconnecting and Reconnecting Service Charge

Current Rate	$25.00
Proposed Rate	$28.00

Meter Pulse Charge

Current Rate:
$9.00 per month per installed set of pulse-generating equipment
Proposed Rate:
$15.00 per month per installed set of pulse-generating equipment

Customer Deposits

Kentucky Utilities Company is proposing no change to the required Customer Deposit for residential electric customers served under Residential Rate RS from the current amount of $135.00 (0% increase), and the required Customer Deposit for general service customers served under General Service Rate GS from the current amount of $220.00 (0% increase). Text change states when Rate GS deposit may be wavied in conjuction with taking service under Rate RS.

Kentucky Utilities Company proposes to change the text of the following electric tariffs: General Service Rate GS, All Electric School Rate AES, Power Service Rate PS, Time-of-Day Secondary Service Rate TODS, Time-of-Day Primary Service Rate TODP, Retail Transmission Service Rate RTS, Fluctuating Load Service Rate FLS, Street Lighting Service Rate ST. LT, Private Outdoor Lighting Rate P.O.LT, Cable Television Attachment Charges Rate CTAC, Curtailable Service Rider CSR10, Curtailable Service Rider CSR30, Excess Facilities Rider EF, Redundant Capacity Rider RC, Supplemental/Standby Service Rider SS, Rider IL for Intermittent Loads, Temporary/Seasonal Service Rider TS, Large Green Energy Rider LGE, Low Emission Vehicle Service Rate LEV, Fuel Adjustment Clause FAC, Demand Side Management Cost Recovery Mechanism DSM, Environmental Cost Recovery Surcharge ECR, and the Terms and Conditions.

Changes to the Terms and Conditions include proposed clarifications on terms and conditions for determining customer rate assignments, as well as when standby or supplemental service must be purchased if customer desires non-firm service.

Although KU is not proposing to change the text of its Fuel Adjustment Clause ("FAC"), other than the correction of a minor typographical error in Paragraph (3), it is proposing to recover certain costs through the FAC to ensure that the correct amounts are collected through base rates and the FAC.

Complete copies of the proposed tariffs containing text changes and proposed rates may be obtained by contacting Lonnie E. Bellar, Kentucky Utilities Company at 220 West Main Street, Louisville, Kentucky, 502-627-4830, or visiting Kentucky Utilities Company's website at www.lge-ku.com.

The foregoing rates reflect a proposed annual increase in revenues of approximately 6.5% to Kentucky Utilities Company.

The estimated amount of the annual change and the average monthly bill to which the proposed electric rates will apply for each electric customer class is as follows:

Electric Rate Class	Annual $ Increase	Annual % Increase	Mthly Bill $ Increase	Mthly Bill % Increase
Residential	$37,381,886	8.03%	$ 7.41	8.03%
General Service	$ 9,061,201	4.97%	$ 9.20	4.97%
All Electric School	$ 635,467	5.81%	$ 82.81	5.81%
Power Service	$ 6,849,989	2.53%	$ 96.29	2.53%
TODS (Secondary)	$ 1,907,198	6.59%	$ 1,160.80	6.59%
TODP (Primary)	$12,380,611	6.62%	$ 6,159.51	6.62%
Retail Transmission	$ 5,128,398	6.50%	$ 11,982.24	6.50%
Fluctuating Load	$ 1,417,956	6.25%	$118,163.01	6.25%
Outdoor Lights	$ 1,267,776	5.41%	$ 0.62	5.41%
Lighting Energy	$ 124	5.42%	$ 11.27	5.42%
Traffic Energy	$ 6,388	5.40%	$ 0.79	5.40%
CTAC	$ 681,722	85.37%	N/A	N/A

The rates contained in this notice are the rates proposed by Kentucky Utilities Company; however, the Public Service Commission may order rates to be charged that differ from the proposed rates contained in this notice.

Notice is further given that any corporation, association, body politic or person with a substantial interest in the matter may by written request, within thirty (30) days after publication of the notice of the proposed rate changes, request to intervene. The motion shall be submitted to the Public Service Commission, 211 Sower Boulevard, P. O. Box 615, Frankfort, Kentucky 40601, and shall set forth the grounds for the request, including the status and interest of the party. Intervention may be granted beyond the thirty (30) day period for good cause shown. Any person who has been granted intervention may obtain copies of the application and any other filing made by the utility by contacting Lonnie E. Bellar, Vice President – State Regulation and Rates, Kentucky Utilities Company, c/o LG&E and KU Energy LLC, 220 West Main Street, Louisville, Kentucky, 502-627-4830.

A copy of the application and testimony shall be available for public inspection at the office of Kentucky Utilities Company, 100 Quality Street, Lexington, Kentucky, or the Public Service Commission, 211 Sower Boulevard, Frankfort, Kentucky.

A copy of this Notice and the proposed tariff, once filed, shall also be available for public inspection on Kentucky Utilities Company's website at www.lge-ku.com.

AREA NEWS

Students Should Check KEES Accounts for Accuracy

FRANKFORT, Ky. (June 29, 2012) — Kentucky high school students and 2012 graduates should check their Kentucky Educational Excellence Scholarship (KEES) accounts for accuracy.

KEES allows students to earn money for college by getting good grades in high school and for qualifying scores on the ACT or SAT. Students eligible for free or reduced lunches may also earn awards for good scores on Advanced Placement and International Baccalaureate exams. KEES is administered by the Kentucky Higher Education Assistance Authority (KHEAA).

To check awards and personal information, students need to use the Zip Access function on www.kheaa.com. If they do not already have a Zip Access account, they can easily set one up from the KHEAA home page.

Students may verify their KEES GPA is correct by taking the letter grade for each course taken during the year and converting it to a 4.0 scale on which an A = 4.0, B = 3.0, C = 2.0, D = 1.0, and F = 0. AP and IB course grades receive one extra point of weight in the calculation, making an A = 5.0, B = 4.0, etc. The GPA is calculated by adding all the points together and dividing the total by the number of credits earned during the year.

Students who need to have GPAs or other information corrected should contact their school counselor.

If students do not see any KEES information, they should call the KHEAA College Access Team at (800) 928-8926.

Students do not have to apply to receive their KEES awards. If they attend an eligible college or university, KHEAA will send their award to the school once the school verifies enrollment.

To learn how to plan and prepare for higher education, go to www.gotocollege.ky.gov. For more information about Kentucky scholarships and grants, visit www.kheaa.com; write KHEAA, P.O. Box 798, Frankfort, KY 40602; or call (800) 928-8926, ext. 6-7372.

Whitfield Issues July 4th Statement

WASHINGTON, D.C. – U.S. Rep. Ed Whitfield, (KY-01), Chairman of the House Subcommittee on Energy and Power, released the following statement on the July 4th holiday.

"As we all prepare to celebrate our Nation's 236th birthday, please take time to remember all who have served and sacrificed to help us remain safe and free. The freedoms we celebrate on July 4th are the freedoms many do not enjoy. It is because of the great sacrifice of the outstanding men and women of our Armed Forces that we continue to have the great freedoms envisioned by our forefathers.

"I wish everyone the best as they celebrate with family, friends and loved ones at picnics and parades across America. Please take the time to thank a service member and our military families, and take the time to remember those who gave the ultimate sacrifice so that we may be free."

CALENDAR OF EVENTS

July 8, 2012

A benefit dinner and auction in honor of Debbie Crider will be held at the Knights of Columbus Hall in Fancy Farm, Kentucky on July 8, 2012. The dinner will be held from 11:00 a.m. until 2:00 p.m. with an auction at 12:30 p.m. Amongst the items up for grabs will be St. Louis Cardinals tickets, third row from the field. All proceeds from the benefit will go towards Debbie Crider who is battling inflammatory breast cancer.

Department for Public Health Issues Safety Guidelines for Warm Temperatures

FRANKFORT, Ky. (June 29, 2012) - The Kentucky Cabinet for Health and Family Services is urging the public to take steps to avoid injury and illness during this period of extreme heat, particularly dangers associated with leaving children in vehicles.

"Extreme temperatures are cause for concern, so we advise the public to take necessary steps to keep cool and prevent harm," said Dr. Steve Davis, M.D., acting commissioner for public health. "Serious injury – particularly for children exposed to extreme levels of heat – can occur. Everyone should take steps to avoid these dangers."

Safe Kids USA works to raise awareness of the dangers of leaving children in hot vehicles. Citing data from the San Francisco State University Department of Geosciences, the organization reported that 33 children died last year due to heatstroke – medically termed "hyperthermia – while there were at least 49 deaths in 2010.

"We want our citizens to understand the dangers of extreme heat, particularly the danger of leaving children in hot cars," said Davis. "Not only are extreme temperatures uncomfortable, they also present a significant health threat. This is particularly true for vulnerable populations such as young children and the elderly."

Several measures are recommended to prevent these types of deaths from occurring. They include:

- Create reminders. More than half of child heat stroke deaths occur because parents and caregivers become distracted and exit their vehicle without their child. To help prevent these tragedies parents can:

− Place a cell phone, PDA, purse, briefcase, gym bag or something that is needed at your next stop on the floor in front of a child in a backseat. This will help you see your child when you open the rear door and reach for your belongings.

− Set the alarm on your cell phone as a reminder to you to drop your child off at day care.

− Set your computer calendar program to ask, "Did you drop off at day care today?" Establish a plan with your day care that if your child fails to arrive within an agreed upon time, you will be called. Be especially mindful of your child if you change your routine for day care.

- Don't underestimate the risk. The inside of vehicles can quickly heat up, even on relatively cool days, so you should never leave your child alone in a car. Don't underestimate the risks and leave them even "just for a minute."

- Lock cars and trucks. Thirty percent of the recorded heat stroke deaths in the U.S. occur because a child was playing in an unattended vehicle. These deaths can be prevented by simply locking the vehicle doors to help assure that kids don't enter the vehicles and become trapped.

- Immediately dial 911 if you see an unattended child in a car. EMS professionals are trained to determine if a child is in trouble. The body temperature of children rises three to five times faster than adults. As a result, children are much more vulnerable to heat stroke. Check vehicles and trunks first if a child is missing.

Additional tips are recommended to avoid other heat-related injury and illness:

- Drink plenty of fluids. Increase your normal fluid intake regardless of your activity level. You will need to drink more fluids than your thirst level indicates. This is especially true for people age 65 or older who often have a decreased ability to respond to external temperature changes. In addition, avoid drinking beverages containing alcohol, because they will actually cause you to lose more fluid.

- Wear appropriate clothing and sunscreen. Choose lightweight, light colored, loose fitting clothing. In the hot sun, wear a wide-brimmed hat that will provide shade and keep the head cool. Sunscreen should be SPF 15 or greater and applied 30 minutes before going out into the sun.

- Stay cool indoors. The most efficient way to beat the heat is to stay in an air-conditioned area. If you do not have an air conditioner, consider visiting a mall or public library.

- Schedule outdoor activities carefully. If you must be out in the heat, try to plan your activities so that you are outdoors either before noon or in the evening. Rest periodically so your body's thermostat will have a chance to recover.

- Use a buddy system. When working in the heat, monitor the condition of your co-workers and have someone do the same for you. Heat-induced illness can cause a person to become confused or lose consciousness.

- Monitor those at high risk. Those at greatest risk of heat-related illness include:

- Infants and children up to 4 years of age

- People 65 years of age or older

- People who are overweight

- People who overexert during work or exercise

- People who are ill or on certain medications for blood pressure or diuretics
